

- Project Name
 - Shop Manager
- Short Description
 - Database system to track jobs performed by a mechanic shop. The system tracks jobs performed on vehicles by certain mechanics, which location work was performed at, as well as who owns the vehicles.
- Target Audience
 - Owners of one or multiple mechanic shops.
- Questions to Answer
 - How many customers/cars are being serviced?
 - How many jobs is a given location handling?
 - Which mechanics are performing the most work?
 - Which mechanics are performing the highest-cost work?
- Major Entities
 - Customer
 - Mechanic
 - Car
 - Work Performed
 - Location
